

REMA FLAT BLADE CONTACT CONNECTORS SRE160 · SRE320 · SRX175 · SRX350

Product features and advantages

- Reliable power connection solution for
 - Electric vehicle batteries
 - Battery chargers
 - Forklift trucks
 - Other DC voltage applications
- Operating voltage determined by housing color
 - Simplifies mating of same voltages
- Plug and socket with identical housing design
 - Reduces quantity of components
 - Reduces purchasing and storage cost
- Acid resistant housing material
- Handels, strain relieves and auxiliary contacts optional
- CE Marking & UL recognized
- Contacts sized for AWG (American Wire Gauge) and metric cross sections
- REMA developed high-grade contacts made out of pure high conductive Cu-ETP copper with silver plated surface and an anti-friction and tarnish coating ensure
 - power transition with minimal losses
 - long life
 - suitable for crimping

2. TECHNICAL SPECIFICATIONS

GENERAL

CONNECTOR MODEL	SRE160	SRE320	SRX175	SRX350
> Wire size	35mm ²	70mm ²	AWG1/0	AWG2/0
> Current rating I _N ⁽¹⁾	160 A	320 A	175 A	350 A
> Voltage rating	600 V	600 V	600 V	600 V
> Operating Temperature (incl. self-heating)	-20 °C ... +105 °C -4 °F ... +221 °F			

(1) depending on cross section and installation

MATERIAL HOUSING

	NORM	>PBT/PC-Blend<
> Halogen-free	DIN VDE 0472-815	ja
> Reaction to fire	UL 94	
> UV resistant		V-0
> Ozone resistant	EN 1175-1	ja
> Creepage current resistance	IEC 60112	225 V

MATERIAL DATA CONTACTS

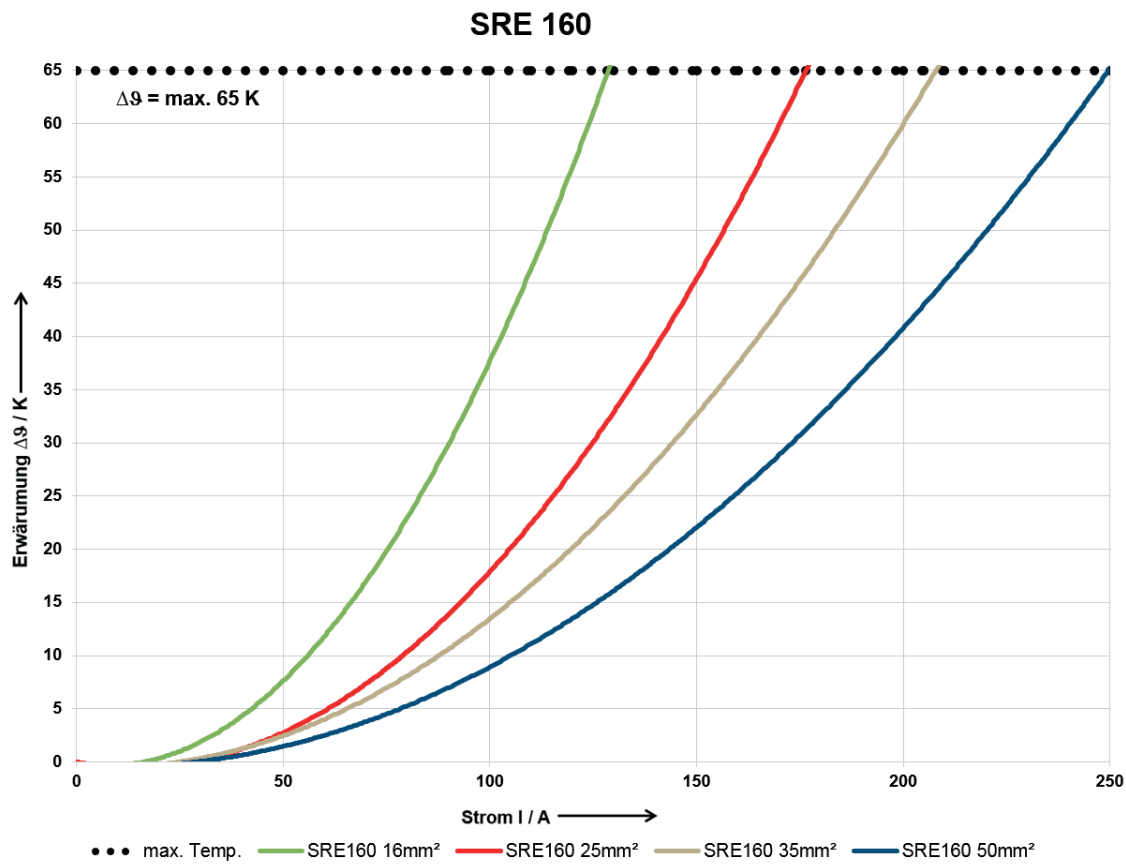

- > Electrolytic high conductive copper Cu-ETP acc. EN 13601 and silver plated surface

3. TEMPERATURE RISE CHARTS

SRE160

The REMA® SRE160 connector system is designed for optimum performance when used 35 mm² cable. The rated operating current is 160 A.

Depending on the cross section and the laying procedure, the current rating is changed.

These following temperature rise curves are for reference. The actual thermal performance may vary depending upon environmental conditions.

Please contact REMA for additional information concerning the SRE160.

SRE320

The REMA® SRE320 connector system is designed for optimum performance when used 95mm² cable. The rated operating current is 320 A.

Depending on the cross section and the laying procedure, the current rating is changed.

These temperature rise curves are for reference.

The actual thermal performance may vary depending upon environmental conditions.

Please contact REMA for additional information concerning the SRE320.

SRX175

The REMA® SRX175 connector system is designed for optimum performance when used 1/0 AWG cable. The rated operating current is 175 A.

Depending on the cross section and the laying procedure, the current rating is changed.

These temperature rise curves are for reference.

The actual thermal performance may vary depending upon environmental conditions.

Please contact REMA for additional information concerning the SRX175.

SRX350

The REMA® SRX350 connector system is designed for optimum performance when used 2/0 AWG cable. The rated operating current is 350 A.

Depending on the cross section and the laying procedure, the current rating is changed.

These temperature rise curves are for reference.

The actual thermal performance may vary depending upon environmental conditions.

Please contact REMA for additional information concerning the SRX350.

5. GENERAL PROCESSING INFORMATION SRE160 · SRE320 · SRX175 · SRX350

Installation of contacts and connector by a qualified electrician in accordance with national and local electrical codes and the following instruction only. Crimp contact to the cables according to the´s assembly instructions. The following instructions serve as a reference.

➤ 1.Strip wire

- Select the correct strip length from table 1.
- Do not cut into cable strands!

➤ 2. Crimpverbindung an den Kabel

- Select contact from table 1.
- Use only suitable die sets!

➤ 3. Insert the wired contact into the rear of the hosing according to picture 2

- Make sure that the smooth contour of the contact is upwards so that the contact underside moves over the housing spring (picture 2) and is retained with an audible click.
- To check engagement, pull gently on the cable to make sure contact is correctly locked over the housing spring.

Table 1: Overview Table

TYPE	Contact Part-No.	Wire Size AWG or mm ²	„X“ in mm acc. pic. 1	X“ in inches acc. pic. 1
➤SRE160	109382	16 mm ²	20	0,78
➤SRE160	109378	25 mm ²	20	0,78
➤SRE160	109380	35 mm ²	20	0,78
➤SRE160	109376	50 mm ²	20	0,78
➤SRX175	109374	1/0 AWG	26	1,02
➤SRE320	102756	35 mm ²	20	0,78
➤SRE320	109199	50 mm ²	20	0,78
➤SRE320	109384	70 mm ²	20	0,78
➤SRE320	109389	95 mm ²	24	0,94
➤SRX350	109385	2/0 AWG	31	1,22

Picture1: Strip length

Picture 2: Assembly of wired contact into housing

Picture 3: Installed contact into housing

Disassembly

- > Switch off power the contact according to DIN EN 60079-14 when dis-assembling the contact.
- > Remove contact by pressing the spring at the front of the connector with a small insulated screwdriver. Simultaneous while pressing the spring, pull gently on the cable to remove the contact from the housing.

SAFETY NOTE

Lay the cables free of tension!
 In torsional and / or tensile forces
 in the cable using the cable clamp
 REMA SRE / SRX is recommended.
 Part No.: 109201

6. DIE SETS

General processing information

- Please only use suitable REMA die sets. Only those guarantee a secure electrical connection.
- Please actuate die sets always until the end.
- Only process contacts with clean sleeves. The contaminated crimpsleeves increase the contact resistance and may lead to overheating.
- Please always set the die sets centred on the crimp sleeves.

Hydraulic tool pliers set HP60 Type H60 - Die Sets

- Indent crimping press area 6 – 70 mm²
- Double indent crimping press area 16 – 70 mm²

Set Part-No. 107138

Set Part-No. 113032

Typ C130 - die sets

- Indent crimping press area 10 – 95 mm²
- Souple indent crimping press area 10 – 240 mm²

For further questions, please contact your REMA Sales department.
